

Interaction of fuzzy values

without interaction

with interaction

Direct Interaction of fuzzy values - example

fuzzy input values \tilde{x}_1 and \tilde{x}_2

constraint \Rightarrow a priori interaction

$$\tilde{x}_1 - 2 \cdot \tilde{x}_2 \leq 4$$

cartesian product with a priori interaction

Indirect Interaction of fuzzy values - example

mapping operator

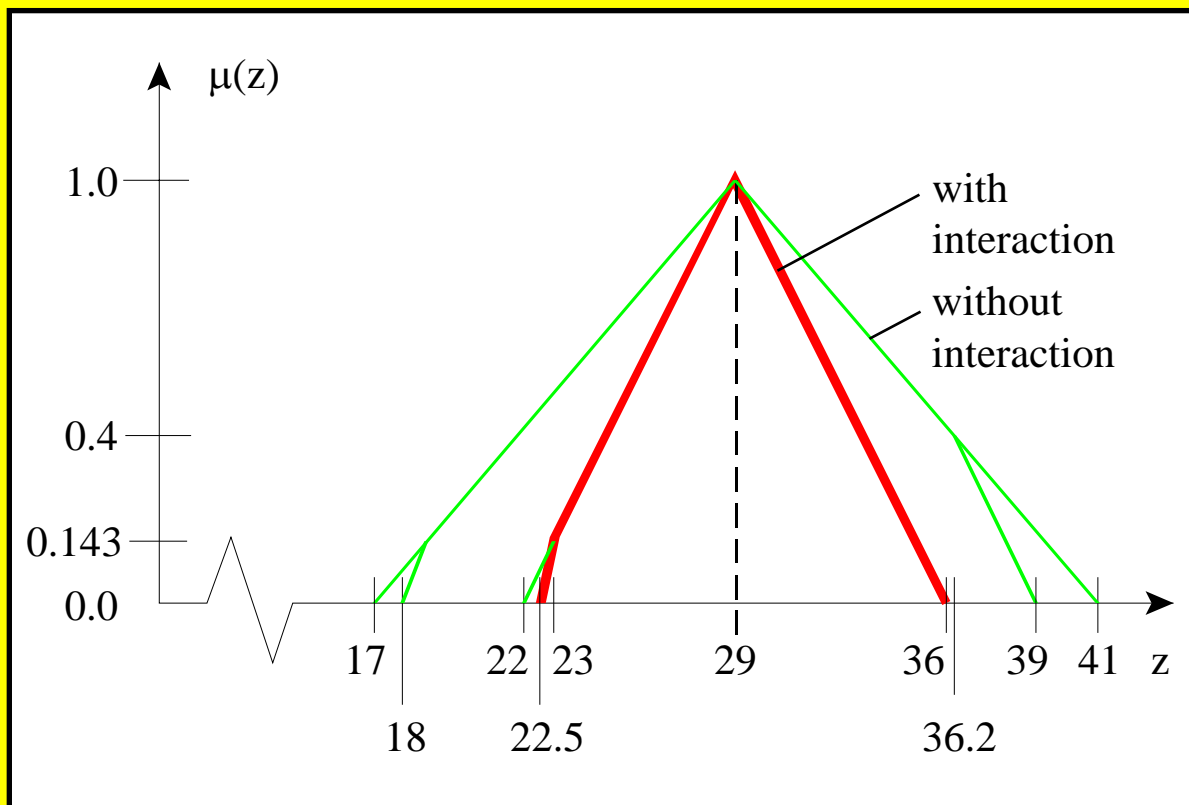

$$z = f(x_1; x_2) = 2 \cdot y_1 + y_2 \quad \text{mit: } y_1 = x_1 + x_2 \quad \text{und} \quad y_2 = x_1 - x_2$$

fuzzy intermediate results \tilde{y}_1 and \tilde{y}_2 with additional interaction inside the mapping

Interaction of fuzzy values - example

fuzzy result \tilde{z}

Interaction of fuzzy values
